## EXPERIENCE

Sumago Infotech Pvt Ltd Jan 2025 - Mar 2025

Full Stack Developer Intern

- Gained hands-on experience in full-stack development, contributing to both front-end and back-end functionalities, ensuring scalable solutions.
- Led a team of 6 members in developing a **Property Listing and Booking Website**
- Designed and implemented key functionalities including authentication, CRUD operations, and booking.
- Designed NoSQL database schemas to support scalable features.

## PROJECTS

Meet.AI (SaaS AI Agent Video Call Platform)

- Built a real-time video calling platform where users can create custom AI agents that interact contextually during meetings.
- Integrated OpenAI APIs to enable dynamic AI agent responses, meeting summaries, and contextual post-call AI chat.
- Developed features like transcript generation, video playback, and transcript-based semantic search using background jobs.
- Utilized **Next.js**, **tRPC**, and **TanStack Query** for frontend/backend communication and state management.
- Implemented scalable database schemas using **Drizzle ORM** with **PostgreSQL** hosted on **Neon**.
- Used **Stream** for video infrastructure and real-time communication integration.

Resume Sorting using NLP

- Developed a resume sorting application using Natural Language Processing (NLP) techniques to categorize and rank resumes based on job descriptions.
- Utilized Python libraries such as NLTK and spaCy for text processing and classification.
- Implemented a machine learning model to improve sorting accuracy and relevance of the resumes.
